

# M SERIES NESTING

As the modern workstation continues to adopt the notion of ergonomic movement and sit/stand postures, so too must today's training/conferencing environments. Two-person flip-top mobile training tables have existed successfully in the workplace for some time, but this solution does not address the ergonomic conundrum of full-day training sessions. Just as people have now realized with their workstation, sitting for long periods drains you of energy, and the lack of movement is unhealthy. M-Series Nesting combines nesting and mobile single-user desking with the benefits of sit-to-stand. SiS Ergo's manually-operated height-adjustable M-Series mechanism quickly and easily adjusts without

the use of electric power. M-Series Nesting's unique, individually-sized flower petal shape design allows for quick room reconfiguration from training rows to round huddle groups. The desktops can even be optioned with dry-erase white board laminate, allowing the users to jot down notes during a huddle or meeting, flip the top to 90 degrees, raise the desk, and present on their own personal white board. All these functions combine into a single, intuitively-designed training table, designed and built in Denmark, and backed by a 10-year mechanical/lifetime workmanship warranty. Your training room has now become an ergonomic, innovative and flexible resource for your 21st century office.

## WORKSURFACE DIMENSIONS

Choose your dimensions.

**A** Range = 28"  
**B** Range = 22"

*Please speak with your Sales Rep for additional work surface dimensions and specifications.*

## FRAME FINISHES

Custom finishes require testing & longer lead times.

**S** Silver    **B** Black    **W** White    **40** Mocha\*

*\*Custom color. Longer lead times and additional cost may apply.*

### WORKSURFACE

Available in custom shapes with a max width of 28" and max depth of 22" .

### OPTIONAL TILT

Choose your angle: 0°, 15°, 22.5°, 45°, or 90°.

### COLUMN

Available in Ultra Light column.

### BASE

Base incline allows easy nesting for maximum space saving without compromising aesthetics or functionality.
