

PERSONAL HEALTH ASSISTANT TRACKER

The Personal Health Assistant Tracker comes fully loaded with an LED reminder to help you stay on track. A blinking, and then stationary, orange light will indicate it's time to change your position while a green light means you're in the clear. Its touch activation drives the desk in the direction of the tilt. Tilting the tracker downward will drive the desk down and vice versa. The Bluetooth® integration is available for both your computer and your phone (iOS and Android) and gives you the power to set your standing goals. Additionally, 4 memory positions are available, giving you the perfect height every time.

Standard Features:

Programmable Positions: 4
LED Reminder: Yes (2 colors)
Digital Display: Yes
Bluetooth®: Yes
